

Architectural Control Committee Report – Q1 2020

- 1737 Nestlewood; Request to replace front wooden walkway and back deck stairs with exact versions; Request was deemed not in need of ACC review because new versions would be exactly like the older ones.
- 1741 Nestlewood; Request to approve new roof shingles; Description was provided and ACC approved the request.
- 1721 Silverwood; Request to put up an aluminum fence along the back yard perimeter. Photo samples were provided; ACC decided that the aluminum fence would not appropriately reflect the look and feel of the Forest and made the request that the homeowner consider a wooden fence instead. The homeowner reached out to the Board and asked for its input. The Board offered to have the homeowner present her case and the Board would weigh in. Homeowner decided to go with the wooden fence after all.
- 1733 Nestlewood; Request to enclose an existing covered deck by adding one screen wall; ACC approved the request.
