This was for discussion tonight and I thought I forwarded this to you all for review beforehand. At least you get a week to look at the below estimate, sorry 'bout that!

Happy Reading :(

Thanks,
Tracie

Subject: Nichols Stahlco Line Pump Quote

Hello Tracie,

I hope all is well. This email will serve as an official quote, good for 30 days, to perform your grout pumping service out to the gazebo to fill the whole under the gazebo as discussed in our meeting. Below is a list of how our rates are calculated...

Line Pump base rate is \$175 per hr with a 3 hr on site minimum.

With the amount of line needed to complete the job there will be an extra \$75 per hr for an extra man.

\$4 per yard pumped

1 hr min travel charge

Because you are basically self performing this task, I feel the need to be present on site during the process to help guide and properly communicate things at \$75 per hr.

+ 10 % fuel surcharge of the total

I wanted to remind you that even though you had someone look at the void, it could potentially take more than the estimated 5 or 6 yards of material and I think it would be wise to be prepared for more material if necessary.

Using the above rates I can attempt to estimate how much this will cost... 4 hrs on site, 6 yds of material, 1 hr travel charge along with the extra labor. \$1652.20 Again, this is only an estimate and if we end up having to pump more material we will be there longer, therefore costing more.

I hope this helps and if you have any questions, feel free to contact me.

Kind Regards,

--
